Media Release

Bombora wishes to congratulate Blue Glass, for their success in winning the Australian Clean Technology Competition 2013, and all the other category winners.

As a semi-finalist, Bombora would also like to publicly thank the organisers and the competition sponsors. Shawn Ryan (Executive Director) said “We have greatly appreciated the public exposure and industry peer recognition during our fundraising activities, which have occurred concurrently with the program.

We also now have secured access to the complementary suite of Autodesk products and can now utilise this to provide a very quick system visualisation tool to engage with and provide understanding for people who don't have a technical back ground.”
